12th 92%

PROJECTS

Code Auction
Code Auction was a website developed for the annual fest "SANKLAN 2023" of the department. The objective of this project was to create a platform where participants could form teams, bid on questions, and submit their answers. As a member of the backend team, my responsibilities revolved around utilizing JDBC, Servlet, and JSP technologies to implement the required functionalities.

Automatic Code Evaluation
Helps teachers to automatically check the students code

Animal Rescue
Animal Rescue was a web application developed to facilitate the rescue and assistance of animals in need. The objective of this project was to provide a platform where individuals could submit details of animals facing health issues, and registered users could filter animals based on their location to offer help. The project utilized Servlets, Java, and JSP , MySQL technologies to implement the required functionalities.

VOLUNTEER EXPERIENCE

Department Of Computer Science
Student Intern

Worked as a student Intern on the project Automatic Code Evaluation under the guidance of Prof. Neeima Gupta
